***SPECIALIZING IN QUALITY  
SMOKE ODOR REMOVAL***

***(847) 977-9359***

---

## WHAT DO WE DO?

---

Afterburn, Inc. has the ability to remove the lingering odor of smoke from your vehicle in a matter of minutes. Our tech's are IICRC Certified and have the qualifications and equipment necessary to rid you of the nasty odor that smoke leaves behind.

Many companies advertise that they can remove the smoke odor, but in reality they only mask or cover the odor which is a very temporary solution. Afterburn, Inc. offers a more permanent solution.

## WHAT DOES IICRC CERTIFIED MEAN?

---

IICRC stands for Institute of Inspection Cleaning and Restoration Certification. IICRC designation is given after a successful completion of classes that follow industry standards as well as achieving a passing grade on a standardized exam. Once certification is granted, technicians must earn Continuing Education Credits (CECs) to maintain their certification.

## HOW DOES IT WORK?

---

The process is quite simple. A dry foam is applied with a sponge to any interior fabric surface.

A "fog" is then sprayed into the interior of the car with the HVAC system running to circulate it throughout the vehicle.

Once the fog dissipates, the vehicle is quality checked for complete odor removal.

## PRICING YOU CAN AFFORD

---

A complete smoke odor removal treatment is only \$35 per car!
